

FIG. 1

FIG. 2

FIG. 2 is a block diagram of a navigation system 110, according to one embodiment of the present invention. The navigation system 110 includes a user interface 131, a positioning system 124, a database 140, an operating system 230, an interface layer 232, and a set of applications 229. The applications 229 include a manager 240, a route calculation module 250, a route guidance module 252, a vehicle position module 256, a map display module 254, a geo-coding module 258, other modules, an ASR dictionary builder 300, a threshold monitor 302, a re-builder 304, and an ASR module 260. The ASR module 260 is connected to an active word list 262 and a database 264.
